**4.-** Estudia la convergencia uniforme de las series

a)  $\sum_{n=1}^{\infty} \frac{1}{n^2} \frac{z^n}{1+z^n}$

Vamos a probar que la serie converge

uniformemente en los conjuntos  $\Omega_1 = \{z \in \mathbb{C} \mid |z| \leq R < 1\}$  y  $\Omega_2 = \{z \in \mathbb{C} \mid |z| \geq R > 1\}$

S.  $z \in \Omega_1$

$$|f_n(z)| = \left| \frac{1}{n^2} \cdot \frac{z^n}{1+z^n} \right| = \frac{1}{n^2} \frac{|z|^n}{|1+z^n|}$$

Como  $|z| < 1 \Rightarrow |z|^n \xrightarrow{n \rightarrow \infty} 0$

En particular dado  $\varepsilon = \frac{1}{2} \exists n_0 \in \mathbb{N} \forall n \geq n_0 \quad |z|^n < \frac{1}{2}$

$$\Rightarrow |1+z^n| = |z^n - (-1)| \geq |-1| - |z^n| = 1 - |z|^n > 1 - \frac{1}{2} = \frac{1}{2}$$

$$\begin{aligned} |-1| &\leq |z^n| + |(-1) - z^n| \\ \parallel \\ |-1 - z^n + z^n| &\end{aligned}$$

Por tanto para  $n \geq n_0$

$$|f_n(z)| = \frac{1}{n^2} \frac{|z|^n}{|1+z^n|} < \frac{2}{n^2} = M_n$$
