$$\Rightarrow 2\cos^2 \theta = 1 + \cos 2\theta \Leftrightarrow \cos^2 \theta = \frac{1}{2} + \frac{\cos 2\theta}{2}$$

$$\Rightarrow f(z) = \cos^2\left(\frac{iz}{2}\right) = \frac{1}{2} + \frac{\cos\left(2 \cdot \frac{iz}{2}\right)}{2} = \frac{1}{2} + \frac{\cos(iz)}{2} = \frac{1}{2} + \frac{\cosh(z)}{2}$$

$$f'(z) = \frac{\sinh z}{2}$$

$$f''(z) = \frac{\cosh z}{2}$$

$$f'''(z) = \frac{\sinh z}{2}$$

$$\Rightarrow f^{(n)}(z) = \begin{cases} \frac{\sinh z}{2} & \text{si } n \text{ impar} \\ \frac{\cosh z}{2} & \text{si } n \text{ par.} \end{cases}, \quad f^{(n)}(0) = \begin{cases} \frac{\sinh(0)}{2} = 0 & \text{si } n \text{ impar} \\ \frac{\cosh(0)}{2} = \frac{1}{2} & \text{si } n \text{ par.} \end{cases}$$

$$\begin{aligned} \Rightarrow f(z) &= \cos^2\left(\frac{iz}{2}\right) = \sum_{n=0}^{\infty} \frac{f^{(n)}(0)}{n!} (z-0)^n = 1 + \sum_{\substack{n=1 \\ n \text{ par}}}^{\infty} \frac{f^{(n)}(0)}{n!} z^n + \sum_{\substack{n=1 \\ n \text{ impar}}}^{\infty} \frac{f^{(n)}(0)}{n!} z^n \\ &= 1 + \frac{1}{2} \sum_{n=1}^{\infty} \frac{z^{2n}}{2n!} \end{aligned}$$

7.- Desarrolla en serie de potencias las siguientes funciones y halla el radio de convergencia

a)  $f(z) = \frac{z}{1+z^2}$   $z_0 = 0$  y  $z_0 = 1$ .

$$z^2 = -i$$

$f(z) = \frac{z}{1+z^2}$  es holomorfa en el disco  $D(0, 1)$  y en  $D(1, |1 - e^{i\pi/4}|)$

$$D(1, \sqrt{2}-1)$$

$$\frac{z}{1+z^2} = \frac{z}{(z - e^{i\pi/4})(z - e^{i3\pi/4})} = \frac{A}{z - e^{i\pi/4}} + \frac{B}{z - e^{i3\pi/4}}$$

$$z = A(z - e^{i3\pi/4}) + B(z - e^{i\pi/4})$$
